Aamodt, O. S., and Stakman, E. C.: The Effect of Fertilizers on the Development of Stem Rust of Wheat 341-380
Acala Upland cotton, comparisons with others 277-320
Acetylene, effect on coloration of lemons 759
Acidity—
apples, changes during storage 18-21
cell sap, daily periodicity 125-128
changes—
in wheat, relation to stem-rust resistance 725-735
produced by growing seedlings in acid solutions 207-217
Egyptian and Upland cottons and hybrids. 286, 295-298, 305, 307, 324, 316
plants, relations to photoperiodism 122-125
relation to germination of *Urocystis tritici*. 467-468
wheat, change during growth and development, studies 726-731
Acid phosphate, effect on wheat stem rust, experiments 346-359, 362-370
Acrostalagmus albus, similarity to *Cephalosporium acremonium* 190, 192
Adjusting Yields to Their Regression on a Moving Average, as a Means of Correcting for Soil Heterogeneity: Frederick D. Richey 79-90
Aecidiospore Discharge as Related to the Character of the Spore Wall: B. O. Dodge 749-756
Alkali land, reclamation possibilities 652-660
Alkalies, effect on fibers 247-248
Allard, H. A., Garner, W. W., and Bacon, C. W.: Photoperiodism in Relation to Hydrogen-Ion Concentration of the Cell Sap and the Carbohydrate Content of the Plant .. 119-156
Alternaria genus, description 699-701
Alternaria mali—
morphological characters 699-708
technical description and variation 701-707
Aluminium, corn plant, determination and distribution 850-858
sulphate, beneficial effects on soils 667-687
Amboceptor, antisheep, in blood of fowls .. 709-715
Anatomy, sweet potato root, and internal breakdown 157-166
Anchorage and Extent of Corn Root Systems: James R. Holbert and Benjamin Koehler .. 71-78
Animals, spread of wheat nematodes 944-947
Antisheep amboceptor and complement in blood of fowls 709-715
Anuraphis bakeri 514
Apateticus bracteatus, enemy of Argus tortoise beetle 49
Aphididae, migration and sexual forms, relation to length of day 513-522
Aphids—
boxelder, life history 517
clover, development, relation to temperature 514
migration, relation to length of daylight . 513-522
sexual forms, appearance, relation to length of light exposure 513-522
Aphis forbesi, life history, notes 513-521
green, apple, life history, notes 516-517
pomi. *See* aphis, green, apple.
rosy apple, life history, notes 515, 518, 519, 521
rumicis, development relation to temperature 515
sorbi. *See* Aphis, rosy, apple.
viburnicola life history, notes 519
woolly, apple, swellings caused on apple trees 696-697
Aplanobacter—
spp., comparison with *Bacterium gummisudans* 228
stewarti, inoculation of corn seed, experiments and results 198-202
Apple—
leaves, spotting caused by *Alternaria mali* 699-707
roots, cultures of *Roesleria hypogaea* 611-613
stem-tumor, comparison with crowngall 695-698

Page

Apple Stem-Tumor Not Crowngall, An: Nellie A. Brown 695-698
Apples—
acidity, changes during storage 18-21
coating, effect on ripening processes of fruit 23-31, 34
respiration of coated and normal fruits, measurements 24-31
ripening, changes on the tree and in storage. 1-23
softening in storage, effect of temperature .. 12-18
storage, physiological studies 1-38
Archibald, J. G.: The Effect of Sodium Hydroxid on the Composition, Digestibility, and Feeding Value of Grain Hulls and other Fibrous Material 245-265
Argus Tortoise Beetle, The: F. H. Chittenden 43-52
Arizona, Sacton Testing Station, cotton breeding experiments 330-331
Arlington Experiment Farm, wheat varieties, testing with flag smut 428, 431, 435-447
Artiemisia tridentata 897-903
Artschwager, Ernst:
On the Anatomy of the Sweet Potato Root, with Notes on Internal Breakdown 157-166
Studies on the Potato Tuber 809-836
Ascaris lumbricoides, eggs—
effect on low temperatures and disinfectants 167-175
exposure to disinfectants 170
resistance to freezing temperatures 167-170
Association of Manganese with Vitamins, The: J. S. McHargue 417-424
Atriplex confertifolia 906-907
Australia, wheat flag smut, occurrence and importance 425, 426, 431
Bacon, C. W., Garner, W. W., and Allard, H. A.: Photoperiodism in Relation to Hydrogen-Ion Concentration of the Cell Sap and the Carbohydrate Content of the Plant 119-156
Bacterial Blight of Gladioli, A: Lucia McCulloch 225-230
Bacterial diseases, comparison with gladiolus blight 228
Bacterium—
gummisudans—
cause of blight of gladiolus 226-229
technical descriptions 229
tumefaciens cause of apple crowngall 695-698
Bailey, Vernon: Breeding, Feeding, and Other Life Habits of Meadow Mice 523-536
Barber, George W.: The European Corn Borer, *Pyrausta nubilalis* Hbn., versus the Corn Earworm, *Heliothis obsoleta* Fab. 65-70
Barberry, infection with wheat stem rust 347
Bard, California, irrigation waters, etc 680
Barfoed's test for monosaccharids 606, 607
Barley—
infection with wheat galls nematode 934-935
rust, infection, relation to fertilizers 349
aecidiospore discharge, studies 749-756
Bean weevil, cold storage, insecticidal, effect. 99-105
Beaudette, F. R., and Bushnell, L. D.: Natural Antisheep Ambroceptor and Complement in the Blood of Fowls 709-715
Beckwith, Angie M.: The Life History of the Grape Rootrot Fungus *Roesleria hypogaea* 609-616
Beetle, Argus tortoise 43-52
Belle Fourche Experiment Station, irrigation, soils samples 630-631
Bibliography—
cotton fertilization 340
desert vegetation 922-925
field mice 534-535
fungi of apple, etc 707-708
grapevine diseases 615-616
irrigated soils 692-693
maize breeding 596
pholoperiodism 155-156

Bibliography—Continued. Page
potato structure ... 834–835
smuts ... 448–449, 486–489
straw hydrolysis ... 263–265
tissue fluids in cotton ... 325–327
vine diseases ... 615–616
wheat blooming ... 244
wheat, diseases ... 954–955
rusts and fertilizers ... 377–379
stem rust ... 408–411
Bicarbonate, determination in soil solutions 642–644
Birds, spread of wheat nematodes ... 944–945
Black alkali, definition ... 683
Blackberry-raspberry hybrids, characters ... 745–746
Black-Bundle Disease of Corn, The: Charles S. Reddy and James R. Holbert ... 177–206
Blackhull kaoliang cross with kafir, seed, color of progeny ... 58–59
Blight, bacterial, of gladioli ... 225–230
Blooming of Wheat Flowers, The: C. E. Leighty and W. J. Sando ... 231–244
Bolls, 4-lock, relation to petal spot ... 508–510
Borer, corn, European, comparison with corn earworm ... 65–70
Botryosphaeria ribis fungus causing currant cane blight ... 838, 839
Brachytic-teosinte hybrids, characters inheritance ... 566–577, 595
Breeding, cotton, experiments in selective fertilization ... 329–340
Breeding, Feeding, and Other Life Habits of Meadow Mice (Microtus): Vernon Bailey ... 523–536
Breeding, plant, measurement of linkage values ... 881–891
Brown, Nellie A.: An Apple Stem-Tumor Not Crowngall ... 695–698
Bruchus—
obtectus, cold-storage experiments ... 99–102, 105
quadrimaculatus, cold-storage experiments ... 102–105
Burbank potato, structural characters ... 827, 828, 832
Bushnell, L. D., and Beaudette, F. R.: Natural Antisheep Ambroceptor and Complement in the Blood of Fowls ... 709–715

Calcium—
corn plant, determination and distribution ... 850–858
determination in soil solutions ... 641
hydrate, use in hydrolysis of straws ... 250, 251
salts, beneficial effects on alkali soils ... 687, 690
Calcium pallidum, relation to *Roesleria hypogaea* ... 609, 610
Cane blight, currant—
description and cause ... 837–838, 841–843
occurrence on other hosts ... 827–844
Capitophorous hippophoes, life history, notes ... 518, 519
Capsella elliptica, occurrence in Utah salt flats 913
Carbohydrates—
plant, relations in photoperiodism ... 149–152
daily variation in leaves of corn and sorghums ... 785–808
Carbolic acid, effect on eggs of *Ascaris* spp ... 170, 172, 173, 174
Carbon—
corn plant, determination and distribution ... 850–858
dioxid—
concentration, effect on ripening of apples ... 31–34
effect on lemon coloration ... 758
origin and function in soils ... 684–686
output in ripening of apples, estimation method ... 25–31
monoxid—
effect on lemon coloration, dangers ... 758
Carbonate, determination in soil solutions ... 642–644
Carbonates, alkaline, in soils ... 683–687
Card, L. E., and Hamilton, T. S.: The Utilization of Lactose by the Chicken ... 597–604
Cellulose, cooked straws, digestibility ... 248
Cephalosporium—
acremonium—
description, growth, and life cycle ... 189–194
growth on artificial media ... 193–194
inoculation of corn seed, experiments and results ... 194–202
technical description ... 192
sacchari—
fungus parasite of corn, notes ... 958–963
similarity to *C. acremonium* ... 191, 192

Page
Cephalosporium genus, characteristics, discussion ... 189–192
Cereals, disease caused by *Tylenchus tritici* ... 925–956
Chaitophorus negundinis, life history, notes ... 517
Changes in Hydrogen-Ion Concentration Produced by Growing Seedlings in Acid Solutions: Jehiel Davidson and Edgar T. Wherry ... 207–218
Chelymorpha cassidea, description, distribution, habits and development ... 43–48
Chemicals, resistance by wheat nematodes ... 951
Chicken—
alimentary tract, lactase occurrence ... 605–608
crop, lactase occurrence ... 607
feed, lactose utilization ... 597–604
serum—
action on cells of various animals, literature, citations ... 709–711, 715
effect on sheep cells, experiments ... 714–715
Chittenden, F. H.: The Argus Tortoise Beetle ... 43–52
Chlorid content of tissue fluids of indicator plants, Utah ... 893–924
Chlorin, corn-plant, determination and distribution ... 850–858
determination in soil solutions ... 642
Chromosomes, multiplication in raspberries, cause ... 745–746
Cobbler potato, structural characters ... 827, 828, 830
Cobs, corn, elemental composition and weight ... 848–858
Cockle disease, wheat, description, etc ... 925–956
seeds, identification ... 939
Cold storage, insecticidal effect on bean weevils ... 99–105
Collins, G. N.: Measurement of Linkage Values ... 881–891
Coloration, lemons, hastening ... 757–769
Color, seed, inheritance in certain grain sorghum crosses ... 53–64
Conidia, *Sclerospora graminicola*, nocturnal production ... 771–784
Conidiophores of *Sclerospora graminicola*, development ... 773–774, 776
Coniocybe pallida, relation to *Roesleria hypogaea* ... 609, 610
Corn—
belt, crop rotations, relation to *Gibberella saubinetii* ... 877
black-bundle, symptoms, history of disease, and causes ... 177–206
borer, European, comparison with corn earworm ... 65–70
brachytic, hybrids with teosinte, heredity studies ... 577–594
composition of organs and dry weight ... 848–858
crinkly, hybrids with teosinte, heredity studies ... 539–566
earworm, comparison with European corn borer ... 65–70
fungi, literature, citations ... 964
growing, elements, removed from soil and air by acre crop ... 856–858
hybrids with teosinte, heredity studies ... 537–596
infestation with corn borer and with earworm ... 66–68
inoculation—
with *Gibberella saubinetii* ... 871–877
rots, experiments and results ... 961–963
leaves of, carbohydrates, daily variation ... 785–808
plant, composition ... 845–860
planting experiments, adjusting yields for soil heterogeneity ... 83–90
purpling, symptom of black-bundle disease ... 177, 178, 179, 183–187
ramose, hybrids with teosinte, heredity studies ... 539–566
root-pulling machine, description ... 71
root system, anchorage and extent ... 71–78
rootrot, caused by *Gibberella saubinetii*, relation to crop successions ... 861–880
Corn Rootrot Studies: Thomas F. Manns and Claude E. Phillips ... 957–964
Corn—
roots, effect of rootrot, susceptibility ... 74–77
rotation for corn belt ... 877
seed inoculation with *Cephalosporium acremonium*, experiments ... 194–202
susceptibility to rootrot, effect on root systems, studies ... 74–77

Corn—Continued. Page
uprooting, force required, studies 72-73
varieties and strains, experimental growing for comparisons 79-90
yield, adjusting, methods of 84, 85, 88-89
decrease due to black-bundle disease 178, 179, 194-202
Corncobs, processed, feed value 951
Cornstalk disease due to *Gibberella saubinetii* 181
Cosmos, exposures, long-day and short-day experiments and results 129-135, 136
Cotton—
breeding, experiments in selective fertilization 329-340
Egyptian, comparison with Upland cotton as to selective fertilizers 331-332, 338-339
fertilization, selective 329-340
hybrid, tissue fluids, comparison with parent cottons 283-320
hybrids—
heredity, studies 493-511
relation to selective fertilization 332-335
leaf tissue fluids, physicochemical constants 277-280
Pima, petal spot, inheritance 491-512
pollen tuber, growth rate, relation to selective fertilization 335-338
tissue fluids 267-328
studies, materials, and methods 270-276
Upland, comparison with Egyptian as to selective fertilization 331-332, 338-339
Course of Acidity Changes During the Growth Period of Wheat with Special Reference to Stem-Rust Resistance, The: Annie May Hurd 725-736
Cram, Eloise B.: The Influence of Low Temperatures and of Disinfectants on the Eggs of *Ascaris lumbricoides* 167-175
Cresol, effect on eggs of *Ascaris* spp. 172-174
Crinkly-teosinte hybrids, characters inheritance, studies 539-566, 594
Crop rotation, relation to diseases caused by *Gibberella saubinetii* 861-880
Crops, yields, adjusting for correction of soil heterogencity 79-90
Crowngall, apple, distinction from stem tumor 695-698
Cucurbita, pollen germ pores 755
Currant, cane-blight fungus, occurrence on other hosts 837-844
Cyanamid, chemical and biological studies and some products 37-69
Cytological Studies of Diploid and Polyploid Forms in Raspberries: Albert E. Longley and George M. Darrow 737-748
Daily Variation of the Carbohydrates in the Leaves of Corn and the Sorghums: Edwin C. Miller 785-808
Darrow, George M., and Longley, Albert E.: Cytological Studies of Diploid and Polyploid Forms in Raspberries 737-748
Davidson, Jehiel, and Wherry, Edgar T.: Changes in Hydrogen-ion Concentration Produced by Growing Seedlings in Acid Solution 207-217
Daylight, length—
effect on migration and sexual forms of aphididae 513-522
relation to acidity and carbohydrate content of plants 119-156
Denny, F. E.: Hastening the Coloration of Lemons 757-769
Desiccation, effect on wheat galls 950
Diarrhea, chicken, result of lactose feeding 602, 603
Dickson, James G., Koehler, Benjamin, and Holbert, James R.: Wheat Scab and Corn Rootrot Caused by *Gibberella saubinetii* in Relation to Crop Successions 861-880
Diehl, H. C., and Magness, J. R.: Physiological Studies on Apples in Storage 1-28
Diplodia zeae, cause of corn rot, notes 957-963
Diploid raspberries, histories and cytological description 739, 740-742, 746
Deserts, comparison with Tooele Valley, Utah 918
Disinfectants, effect on eggs of *Ascaris lumbricoides* 170-174
Distichlis spicata, physicochemical constants 910, 911, 912
Dodge, B. O.: Aecidiospore Discharge as Related to the Character of the Spore Wall 749-756
Early Ohio potato, structural characters 827, 828, 830
Earworm, corn, comparison with European corn borer 65-70
Effect of Fertilizers on the Development of Stem Rust of Wheat, The: E. C. Stakman and O. S. Aamodt 341-380
Effect of Nitrate Applications upon the Hydrocyanic-Acid Content of Sorghum: R. M. Pinckney 717-724
Effect of Rust Infection upon the Water Requirement of Wheat: Freeman Weiss 107-118
Effect of Sodium Hydroxid on the Composition, Digestibility, and Feeding Value of Grain Hulls and Other Fibrous Material: J. G. Archibald 245-266
Eggs, manganese in 422-423
Egyptian cotton—
comparison with Upland and hybrid cottons 277-320
in selective fertilization 331-332, 338-339
growth and characteristics 268-270
Electrical conductivity—
Egyptian and Upland cottons and hybrids 279, 291-293, 303, 314-316
of tissue fluids of indicator plants, Utah 893-924
ratio to freezing points of cotton 280, 293-295, 303-305, 306, 314, 316
Elemental Composition of the Corn Plant: W. L. Latshaw and E. C. Miller 845-860
Emersons', R. A.: method of measuring linkage value 884-885, 891
Emersonella niveipes, enemy of Argus tortoise beetle 49
Ergot sclerotia, cause and identification 939
Ethylene—
effect on lemon coloration, experiments and cost 761-767
low concentration, effect on lemon coloration 760-761
sources, chemical and physical characters and uses 766-767
Euchlaena spp., hybrids, heredity studies 537-596
European Corn Borer, *Pyrausta nubilalis* Hbn., versus the Corn Earworm, *Heliothis obsoleta* Fab.: George W. Barber 65-70
Experiments with Flag Smut of Wheat and the Causal Fungus, *Urocystis tritici* Kcke.: Marion A. Griffiths 425-450
Eyes, potato, description, arrangement, and development 819-821
Feed, chicken, lactose utilization 597-604
value of processed fibers 248-251
Fern, sweet, rust aecidiospore discharge method 754
Fertilization, selective, in cotton 329-340
Fertilizers—
effect on rust development 115-117
stem rust development on wheat 341-380
Feterita, crosses with other sorghums, seed color of progeny 55-58, 59-61
Fiber—
effect of sodium hydroxid and other alkalies 247-248
hydrolysis, development of process 248-251
Fibrous materials, chemistry 246-247
Flag smut, wheat—
distribution and economic importance 426, 451-452
parasitism of causal organism, by R. J. Nobie 451-490
physiological studies 425-450
symptoms 427-429, 452-453
Flats, salt, Utah, vegetation and water 912-914
Food—
meadow mice, habits and losses occasioned 531-533
stored by field mice, value to Indians 531, 534
Formaldehyde, effect on lemon coloration 759
Fowl, blood, antisheep amboceptor and complement 709-715
gizzard, grit function in 413-416
lactase occurrence in intestines of 605
Freezing point, depression of tissue fluids in indicator plants, Utah 894-916

Page
Freezing point, Egyptian and Upland cottons and hybrids.... 286, 287–291, 299–303, 314, 316
temperatures, effect on eggs of *Ascaris lumbricoides*..... 167–170
Frog-eye, leaf spots on apple, cause..... 699

Suckering, excessive, symptom of black-bundle disease of corn ... 177, 184-186, 195-200
Sugar, reducing, determination method, Munson-Walker-Bertrand ... 599-603
Sugars—
determination in sap of wheat varieties ... 402-403
in corn and sorghum leaves ... 790-801, 805-806
Sulphate, determination in soil solutions ... 641
Sulphur, corn plant, determination and distribution ... 850-858
Sulphuric acid, effects on alkali soils ... 687-689
Sunflowers, planting at two-week intervals, experiments and results ... 145-147
Sunrise kafir, crosses with other sorghums, seed color of progeny ... 55, 57, 58, 61, 63
Sweat room atmosphere, affect on lemon coloration, analysis data ... 758
Sweet potato—
injury by Argus tortoise beetle ... 43, 46, 48, 49
root, anatomy, and internal breakdown of ... 157-166
Tannin, in potato cells ... 824
Temperature—
effect on lemon coloration rate ... 762
low, effect on eggs of *Ascaris lumbricoides* ... 167-175
Tents, lemon, coloration experiments ... 763
Teosinte-maize hybrids, inheritance of characters ... 537-596
Tissue Fluids of Egyptian and Upland Cottons and Their F_1 Hybrid: J. Arthur Harris, Zonia Wallen Lawrence, W. F. Hoffman, John V. Lawrence, and A. T. Valentine ... 267-328
Tithonia rotundifolia, response to length of day ... 139-140
Tissue fluids. *See* Sap
Tobacco, Maryland Mammoth, response to daylight, length, experiments ... 139
Tomatoes, manganese in ... 423
Toxascaris limbata—
effect of disinfectants on ... 170
eggs, exposure to low temperatures, results ... 167
Transpiration, plants, effect of parasitic infection ... 108-110
Triumph potato, structural characters ... 827, 828, 830
Tubers, potato, description, structure, growth, and chemical constitution ... 809, 813-819, 823-825
Tylenchus tritici—
cause of nematode disease of cereals ... 925-956
description and life history, longevity, etc ... 939-941, 949-952, 954
Upland cottons, comparison with Egyptian and hybrid cottons ... 277-320
Up-to-Date potato, structural characters ... 827, 828, 833

Page

Uric acid, effect on determination of lactose..... 599-602
Urocystis—
spp., spore germination morphology..... 479-480
tritici—
cause of flag smut of wheat, study..... 425-450
development and relation to its host... 453-470, 479-484
parasitism, studies..... 451-490
spore germination stimulation..... 458-466
Utah—
Stansbury Mountains, typical vegetation..... 896-898
Tooele Valley, indicator plants, tissue fluids, composition, etc..... 893-924
Utilization of Lactose by the Chicken, The: T. S. Hamilton and L. E. Card..... 597-604
Valentine, A. T., Harris, J. Arthur—Gortner, R. A., Hoffman, W. F., and Lawrence, J. V.: The Osmotic Concentration, etc., of Tissue Fluids of the Indicator Plants of Tooele Valley, Utah..... 893-924
Lawrence, Zonja Wallen, Hoffman, W. F., and Lawrence, John V.: The Tissue Fluids of Egyptian and Upland Cottons and their F_1 hybrids..... 267-328
Vapors, effect on lemon coloration..... 767
Vegetation, types in Utah, Tooele Valley, physicochemical characters..... 895-918
Viala and Pacottet, cultures of *Roesleria hypogaea*, comparisons..... 611, 612-613
Vitamins, associated with manganese..... 417-424
Water—
holding capacity of soils and subsoils..... 618-624
irrigation—
comparison with underground waters.. 678-683
penetration, rate and measurement.... 626-631
percolation rate and factors influencing. 631-635
reacting value of constituents..... 647
movement in irrigated soils..... 617-693
relations in plants, effects of photoperiodism..... 121-122
requirement of rust-infected wheat..... 107-118
soil—
availability, relation to type of soil..... 624-626
conditions, relation to irrigation..... 624-626
definitions..... 624
Tooele Valley, Utah, physicochemical constants..... 913
underground—
accumulation and movement..... 668-678
comparison with irrigation waters..... 678-683
composition, statement..... 644-648
Weevil, bean, cold storage, insecticidal effect..... 99-105
Weiss, Freeman: The Effect of Rust Infection upon the Water Requirement of Wheat.. 107-118
Weston, William H., jr.: Nocturnal Production of Conidia by *Sclerospora graminicola*. 771-784

Page

Wheat—
acidity changes during growth, relation to stem-rust resistance..... 725-735
blooming, meteorological relations..... 240-242
disease resistance, relation to acidity..... 731-734
flag smut, and its causal fungus *Urocystis tritici*, studies..... 425-450
flower, blooming process, time, period, etc..... 231-244
growth, acidity changes..... 726-731
infection by flag smut 435-447, 470-479
injury by nematode disease..... 928-932
leaf hairs, relation to stem-rust infection.. 384-385
manganese in..... 419
nematode disease, symptoms, galls, control 936-953
resistance to stem rust..... 381-412
rust infection, effect on water requirement..... 107-118
sap, physicochemical properties, relation to rust resistance..... 401-404
Wheat Scab and Corn Rootrot Caused by *Gibberella saubinetii* in Relation to Crop Successions: Benjamin Koehler, James G. Dickson, and James R. Holbert..... 861-880
Wheat—
seedlings—
growing in acid solutions, changes in acidity..... 210-216
stem, morphology, relation to rust resistance..... 390-394, 404-406
rust—
relation to fertilizers..... 341-380
resistance, relation to acidity changes during growth..... 725-735
stomata, number, size, and movement... 385-388
varieties—
acidity at different stages of growth.... 732-734
sap, physicochemical properties, comparisons..... 401-403
stem-rust infection, effect of fertilizers.. 350-378
structure, comparisons..... 390-394
testing for resistance to flag smut..... 445-447
water requirements, reports of investigators..... 114
Wherry, Edgar T., and Davidson, Jehiel: Changes in Hydrogen-Ion Concentration Produced by Growing Seedlings in Acid Solution..... 207-217
Whittier Citrus Association, aid in lemon coloration studies..... 768
Winesap apples, respiration in storage at different temperatures..... 26-30
Wood meal, processed, feed value..... 250, 252
Worms, pig, control studies..... 167-175
York Imperial apples, respiration in storage at different temperatures..... 28
Yule's, coefficient of association, method of measuring linkage values..... 884
Zizania aquatica, composition, analyses, nutritive properties..... 219-224
